Experience

Frontend developer   Mar - Present

BYIN TECH PRIVATE LIMMITED

Currently working at Byin Tech Private Limited, I have gained extensive experience in **API integration,** utilizing **Redux Toolkit** for state management, and developing applications using Next.js and React. My role involves integrating various APIs to enhance application functionality and implementing **UI frameworks** to create responsive and visually appealing designs.

Projects

TEXT TO SPEECH

Developed a text-to-speech converter web application using JavaScript. Created a user-friendly interface with interactive features. Demonstrated strong problem-solving skills and **web development** knowledge. Showcased ability to build interactive and user-friendly applications.

RESTAURANT-LANDING PAGE

Created a **responsive page** using React and animations, demonstrating front-end development proficiency. Implemented modern design principles to enhance user engagement and ensure cross-device compatibility.
